

11. A RED-LETTER DAY

The giant BYU block letters north of the Wilkinson Center are usually a great spot for Cougar fans to take pictures, but not today--someone has painted the U bright red! What vandal could have perpetrated such a loathsome crime?

**CAN YOU FIND ANY CLUES AT
THE SCENE OF THE CRIME?**

It looks like the culprit was in such a rush that they left a trail of paint behind. Maybe you can catch them red-handed!

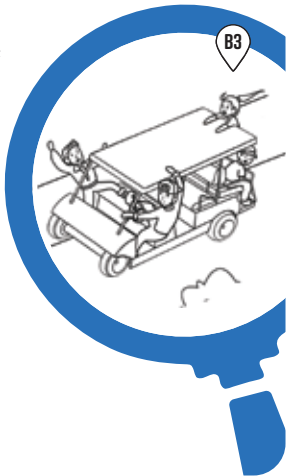

**WHERE DOES THE
PAINT TRAIL END?**

What a shocking surprise! The trail leads right to Dee Utely, who is currently running for BYUSA president! When confronted about the red paint on the hem of his clothes, the traitor admits that he is dual-enrolled at the University of Utah and makes a break for it.

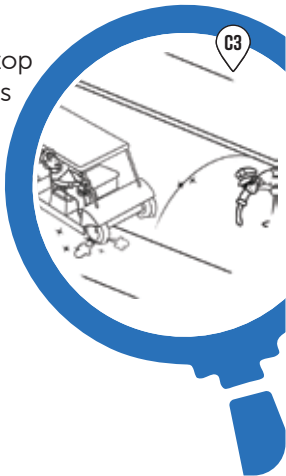

**HOW DOES DEE
ATTEMPT TO ESCAPE?**

Adding to his growing list of nefarious deeds, Dee commandeers a campus-tour golf cart, forcibly ejecting its driver. The backseat occupants, teens attending a BYU writers' camp, are thrilled.

HOW DO THE BYU CAMPUS POLICE STOP DEE'S GETAWAY?

The golf cart races away at top speed (10 mph). The campus police have plenty of time to throw some caltrops in the culprit's path, popping the cart's tires. Dee flees on foot, as the teen authors take notes furiously.

WHERE DOES DEE ESCAPE TO?

Dee finds refuge in the legendary BYU tunnels, a trackless labyrinth that students should never, ever, EVER attempt to access or explore. Hunted by the BYU police, he survives by pilfering from the pneumatic tubes that shoot mint brownies and bottles of chocolate milk to the President's office. And to this day, he haunts campus, his shadowy presence revealed in photobombed engagement photos and the occasional column of Police Beat....

WHAT LURKS IN THE TUNNELS UNDER BYU?

- ☐ A The Ark of the Covenant
- ☐ B Utilities
- ☐ C A lifetime supply of chocolate milk
- ☐ D Cosmo Cougar's secret training facility

UTILITIES

BYU *does*, in fact, have tunnels under campus. Various utilities run through them, including pipes with super-heated, 400° F water. They can be dangerous, so don't be like Dee.

You can learn more about the tunnels in *Y Magazine*: magazine.byu.edu/article/tunnel-vision.
